### IMPOUND

1. T F 2.d. Device and spare parts are impounded, and all items are at room temperature when impounded.

### CHECK-IN AND SETUP

#### Construction Parameters:

|                      |        |                                                                                                                                                                                              |
|----------------------|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2. <u>T</u> <u>F</u> | 3.b.i  | Device does not contain hazardous materials (e.g. asbestos, mineral wool, fiberglass). <b>If F, do not setup or test device and the team may only participate in the written portion.</b>    |
| T F                  | 3.b.ii | Device does not contain thermometers, probes, commercially available thermoses, coolers, or vacuum sealed devices.                                                                           |
| T F                  | 3.c.   | A 9 oz disposable plastic party cup is able to be inserted and removed within the device.                                                                                                    |
| T F                  | 3.d.   | The device, including the cup of water, fits within a 30.0 cm x 30.0 cm x 30.0 cm cube.                                                                                                      |
| T F                  | 3.f.   | Device has no energy sources to warm the water. (e.g. electrical components, battery powered heaters, chemical reactions)                                                                    |
| T F                  | 3.g.   | Device is at room temperature at the start of the event.                                                                                                                                     |
| T F                  | 3.h.   | Competitors are able to answer questions regarding the design, construction, and operation of the device per the building policy found on <a href="http://www.soinc.org">www.soinc.org</a> . |

### HEATING TIME

#### Construction Parameters:

|                      |                                                                                                                                                |                                                                          |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|
| T F                  | 3.e.                                                                                                                                           | No part of the device contacts the water. Nothing is added to the water. |
| 3. <u>T</u> <u>F</u> | <b>ALL CONSTRUCTION PARAMETERS ARE MET ("Check-In and Setup" construction parameters also apply) (If F, apply 0.7 multiplier to TS and PS)</b> |                                                                          |

#### Competition Parameters:

|                      |                                                                                     |                                                                                                                              |
|----------------------|-------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|
| T F                  | 5.II.b                                                                              | No modifications are made to the device after the Device Setup Time finishes except for inserting/removing the cup of water. |
| T F                  | 5.II.d                                                                              | Team does not alter or manipulate the cup or the water in it beyond inserting the cup into their device.                     |
| 4. <u>T</u> <u>F</u> | 5.II.e                                                                              | Team does not touch their device or testing setup during the Heating Time. If F, TS and PS = 0.                              |
| 5. <u>T</u> <u>F</u> | <b>ALL COMPETITION PARAMETERS ARE MET (If F, apply 0.9 multiplier to TS and PS)</b> |                                                                                                                              |

### RESULTS

6. \_\_\_\_\_ Starting Water Temperature
7. \_\_\_\_\_ Predicted Final Temperature (If no prediction is made before the end of Heat Time, leave blank and PS = 0)
8. \_\_\_\_\_ Actual Final Temperature
9. \_\_\_\_\_ Part 1 Raw Score
10. \_\_\_\_\_ Tiebreak #3 Ranking (only if necessary)  
1 is the best, followed by 2, then 3, etc...

11. T F General Rule: The team is disqualified. (Notify the team and their coach as soon as possible.)
